

# Neues from DG AGRI

*Presentation at the Frühjahrstagung des AK-Strukturpolitik der DeGEvalde, on 01 July 2022*

*Francesco GIANOLA- Unit A3 Policy Performance*

# 1. Reorganisation of DG AGRI

- Since February 2022 reorganisation of DG >> [Organisational chart](#) reflects (also) the new CAP delivery model.
- Geographical, thematic units and
- Horizontal units in Directorate A:
  - A1- Policy Perspectives
  - **A2- Analysis & Outlook**
  - **A3- Policy Performance**
  - **A4- Data Governance**

## 2. Switch to performance - need for more data

- The various evaluations carried out in 2014-2020 pointed at a lack of:
  - data on farming practices,
  - granularity of the data available.
- Those detailed data will not be provided in the Annual Performance Reports of Member States, but:
  - [Proposal to convert](#) the Farm Accountancy Data Network (FADN) into a Farm Sustainability Data Network ([FSDN](#)). First data available at best 2026 for 2025 accounting year.
  - Data on CAP for Monitoring and Evaluation at beneficiary level. Implementing Act (hopefully) adopted August 2022. Data on CAP 2023, available in 2025.
  - Statistics on agricultural input and output (SAIO) provisional agreement (June 2022, soon to be adopted). First data on pesticides use published in 2028 (19 crops).
  - Initiatives to increase IACS data sharing.

# 3. Information on CAP 2023-2027

- Classification of interventions:
  - Developed by JRC for ENV/CLIMA/Welfare aspects
- Catalogue of Interventions:
  - Public searchable database in English
  - Describing the interventions implemented by Member States
  - By the EU Evaluation Helpdesk

## 4.(a) Regulatory reporting on the CAP 2023-2027

- Commission report on PMEF: 2022.
- Annual Performance Reports: as from 2025/yearly, one per MS.
- Detailed data on CAP for monitoring and evaluation: as from 2025/yearly.
- Reports to EP and Council:
  - 2023 on MS CAP Plans, describing the joint efforts of MS towards CAP objectives;
  - 2025 on the operation of the New Delivery Model by the MS and combined contribution of MS Strategic Plans interventions to achieve environmental and climate commitments;
  - 2027 on the first results on the performance of the CAP (interim evaluation) **NEW**;
  - 2031 on the performance of the CAP (ex-post evaluation) **NEW**.

## 4.(b) Reporting on the CAP: Effects on Evaluation

- Challenges:
  - For future evaluations the first data on 2023-2027 CAP implementation will only be available in 2025.
  - Ex-post evaluations of the rural development programmes for 2014-2020 are to be submitted by MS by end of 2026.
  - As acknowledged by the ECA, the difficulty to reconcile the policy cycle with the time needed to collect data will imply that DG AGRI will not respect the 'evaluate first principle' for the next CAP.
- Mitigation:
  - Long-term approach to data availability and evaluations for the performance assessment,
  - Rough estimate to assess the contribution of the CAP based on JRC work to estimate the effects of farm practices (supported by the CAP) on climate, soil, water, air, biodiversity (meta analysis)
  - Collaboration with the JRC to develop methodologies to establish causal relationships\*
  - We rely on you!

\* [JRC technical report on balanced territorial development](#) as an example.

## 5. Other news since November 2021

- Several [evaluatons published](#) since November 2021.
- [Report on the CAP performance](#) published.
- [BR toolbox](#) has been published (end November 2021).
- [Agri food data portal](#).

Thank you
